QUICK START GUIDE

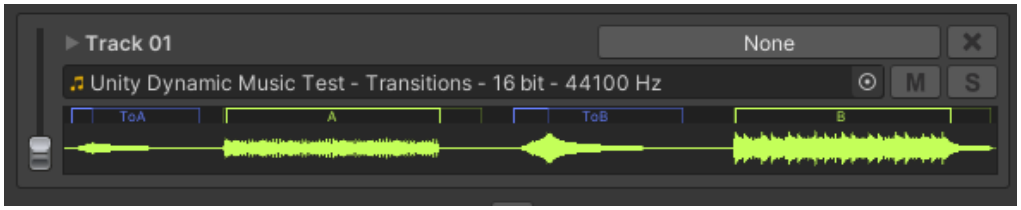

Add the component "Dynamic Music System" to your game object.

Click the [+]-button below "No tracks" to add a track.

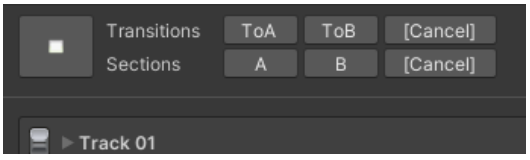

Choose a clip and the waveform will be displayed. Any sections or transitions found in the clip will appear on the timeline. A few AudioSource components were added to the object.

Click the "Start playback" button to audition your clip in the inspector.

If your clip has sections or transitions, you can queue them by clicking on each corresponding button.

Click “Stop” to stop playing.

For more information, check out the full documentation.
